Pure air system

Improved safety and working conditions

Elimination of polluted vapours in confined spaces

provide you a

NEW EXPERIENCE

AIR VENTILATION IN CONFINED SPACES

An extractor sucks in the polluted vapours which are replaced by clean air. The air renewal is activated without opening the door.

The system optimizes work flows by avoiding remote storage of toxic materials or CMR.

**ABSOLUTE SAFETY
OF OPERATORS**

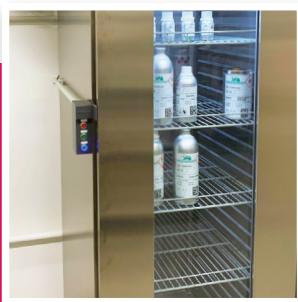

**SAFE STORAGE OF
TOXIC PRODUCTS**

**IMMEDIATE PROXIMITY
TO THE OPERATOR**

**Door unlocking only when
the air is renewed**

**No laboratory's
contamination**

**Time saving
and increased productivity**
